Compatible screens: 43"- 65"

MW-2000

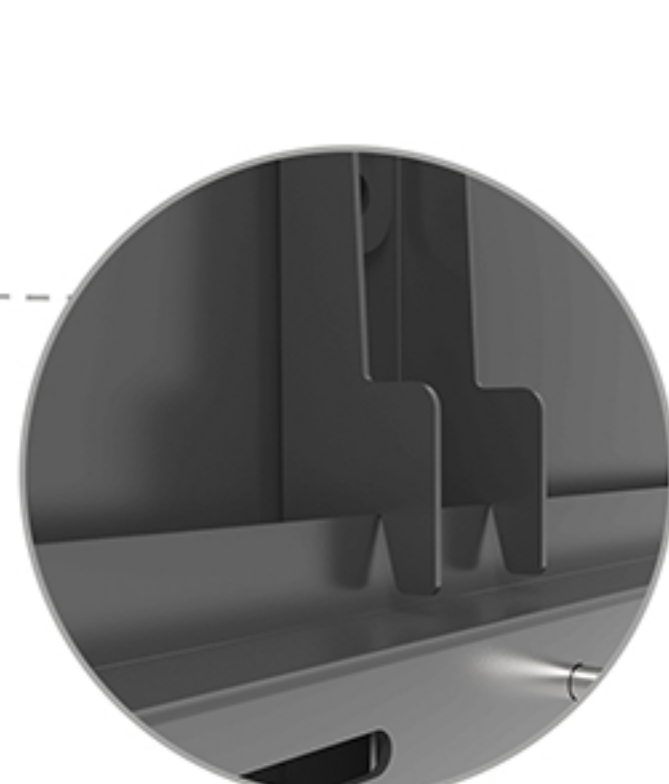

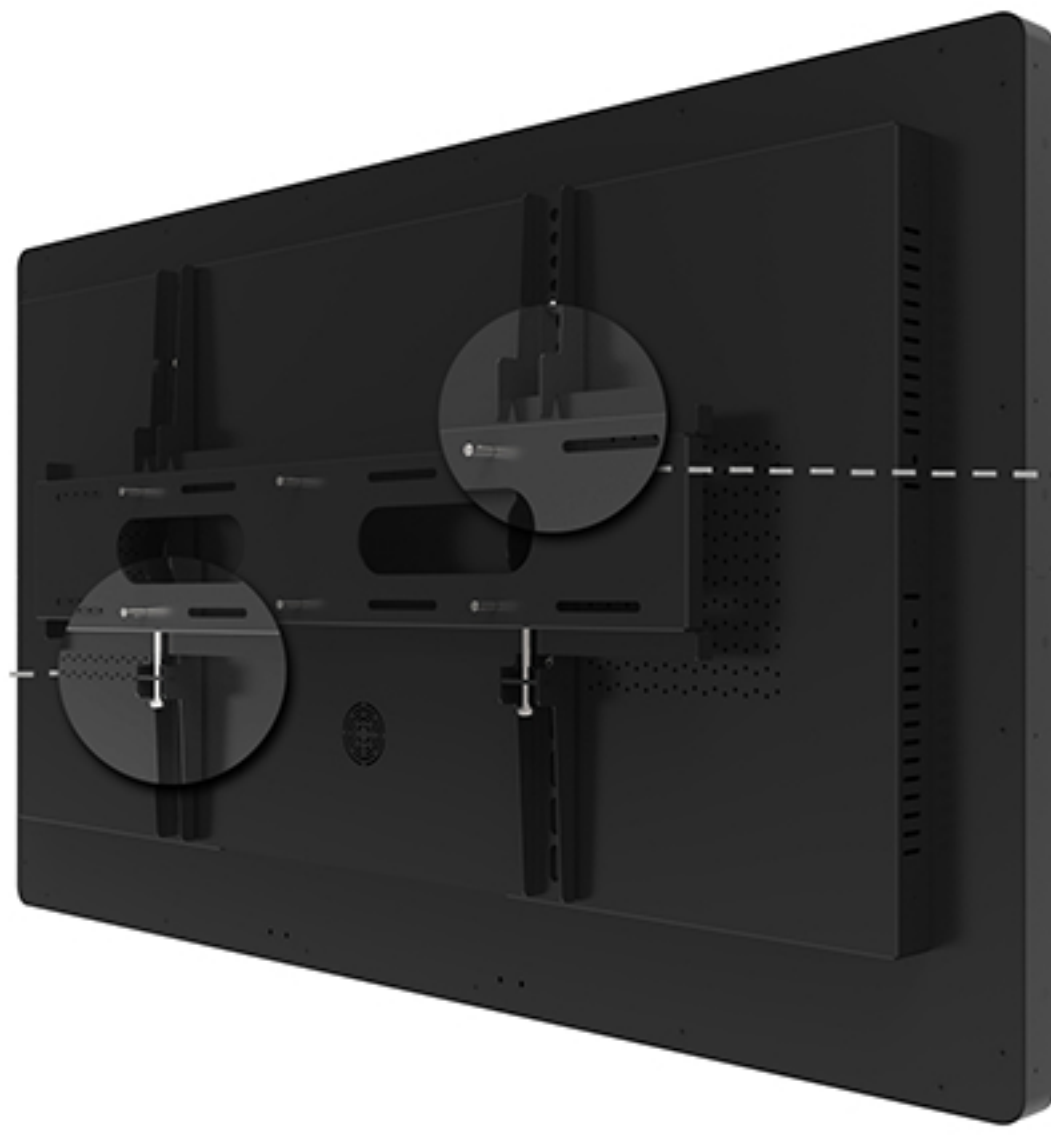

Compatible screens: 50"- 90"

Convenient Installation

During installation, the screen can be locked on the vertical rack first, then directly hung on the horizontal mounting panel. A row of mounting holes are distributed on the vertical mounting rack to facilitate the installation of the screens of different sizes. Located with clasp above the vertical mounting rack and clasp of the long screw below keep the screen from falling off.

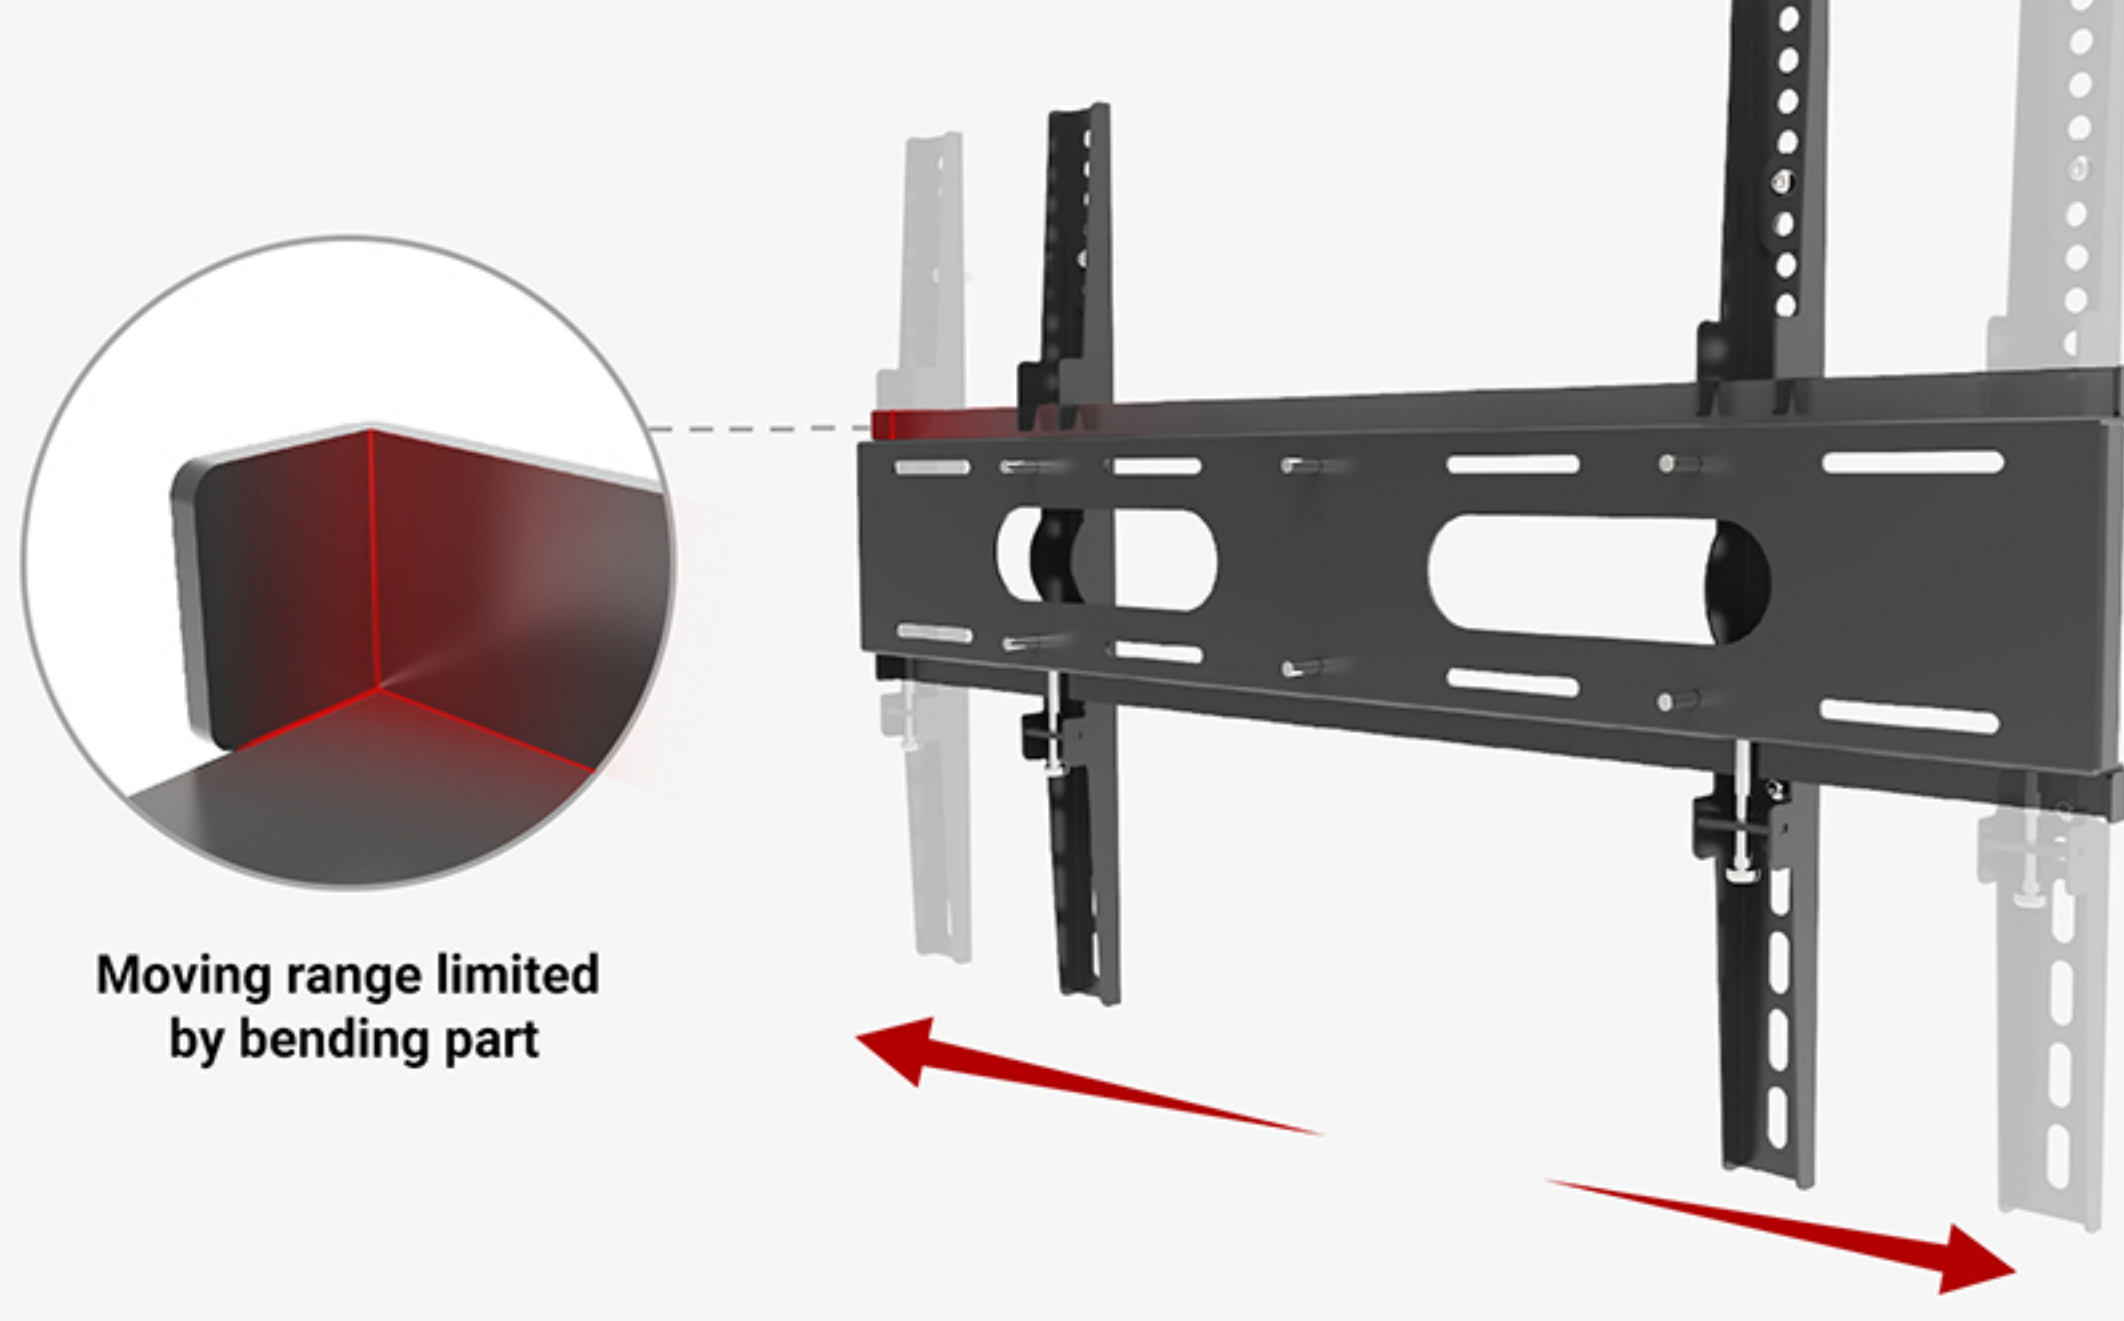

Clasp located with long screw

Located with clasp

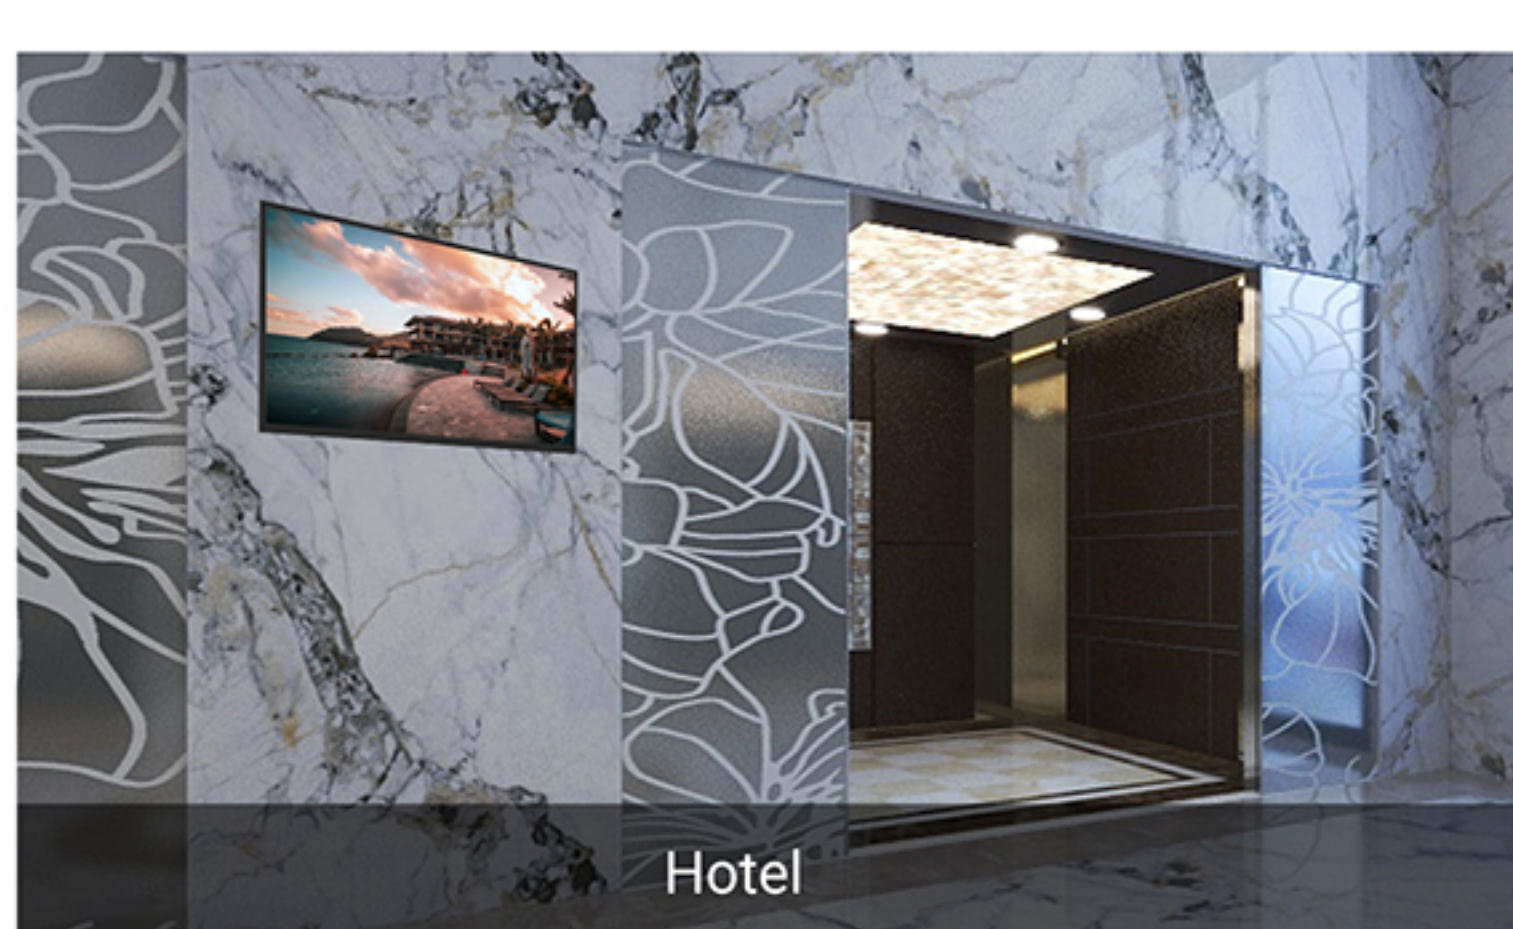

Detail Design Improves Safety Index

On both sides of the horizontal mounting panel, the bending baffle is designed to limit the horizontal motion range of the vertical mounting rack and keep the screen from falling off. It can also increase the load-bearing strength of the horizontal mounting rack to ensure the safety in use.

Moving range limited by bending part

APPLICATIONS

Hotel

Enterprise

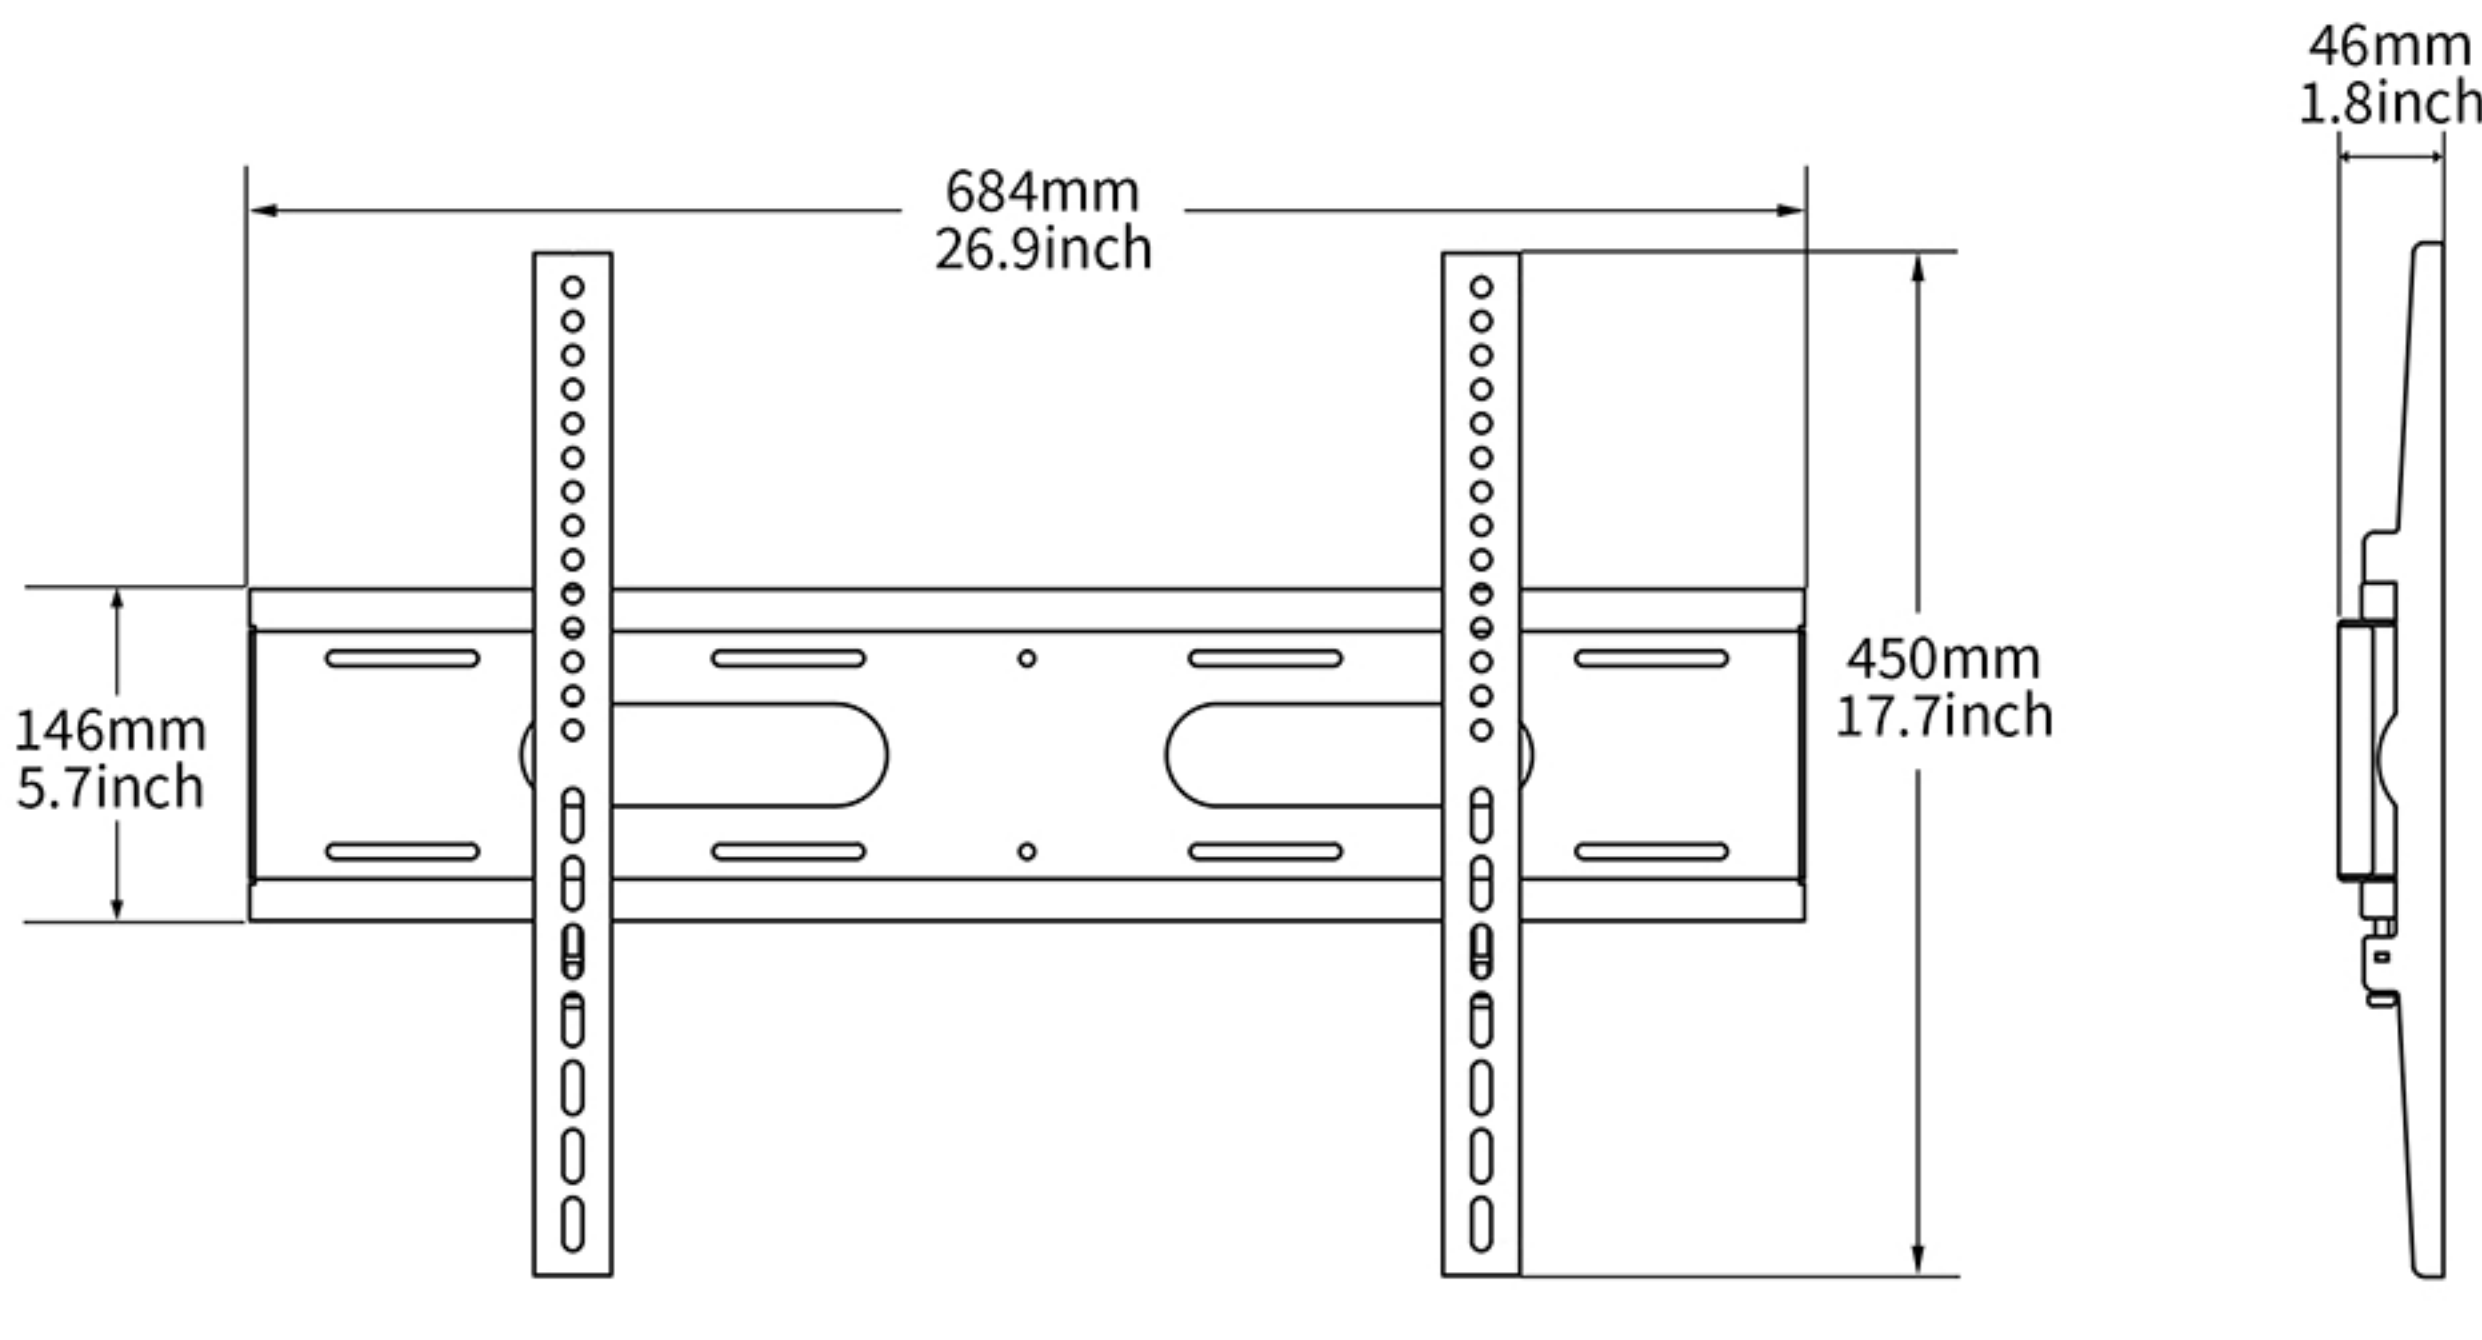

Office Building

Coffee Shop

SPECIFICATIONS

Model No.	MW-1010
Compatible Screens	43"- 55"
Material	SPCC
Surface Finishing	Power coating
Overall Size (mm)	684×46×450
Package (mm)	170×70×720
Net Weight	2.7kg
Gross Weight	3.2kg
Colors	Black (option)
